Q8.

In a firm, the profit P (£1000's), from the number n of items sold is modelled by 2 staff. One claims the model should be $P = 0.5n + 20$, the other says it should be $P = 0.35n + 60$.

The boss will award a staff pay-rise if the two models agree on a profit which exceeds £125,000. Decide if there will be a pay-rise.
